The Association for Overseas Technical Cooperation and Sustainable Partnerships [AOTS]

1. BACKGROUND OF THE PROGRAMS:

The Association for Overseas Technical Cooperation and Sustainable Partnerships (AOTS) is an organization for human resources development mainly in overseas countries to promote technical cooperation through training, experts dispatch and other programs. Through those programs, we aim at contributing to the mutual economic growth of developing countries and Japan as well as enhancing friendly relations among those countries.

AOTS was established in 1959 with the support of the Ministry of International Trade and Industry (which is the present Ministry of Economy, Trade and Industry: METI) as Japan's first technical cooperation organization on a private sector basis. More than 200,000 individuals from 198 countries and regions have undergone our training in Japan, while the cumulative attendance at our overseas programs till the end of fiscal 2022 exceeded 230,000.

AOTS organizes and develops a various range of training courses based on requests from returning participants and industry in developing countries.

The Program on Business Innovation and Organization Development (BIOD) is a training program for owners, executives and senior managers who are responsible for business planning, human resource development, and organizational development. Also, participants will visit Japanese companies that are revitalizing their organizations by practicing organizational development, and through dialogue with owners and executives, participants will consider what kind of initiatives can be taken at their own companies.

[2nd Step]

Through lectures and exercises, participants will learn the importance of having the necessary mindset and mission as a business leader to bring about business innovation, and clearly establishing their company's management philosophy (mission, vision, and values). In addition, participants will visit Japanese companies that conduct excellent management based on clear management principles, and learn about the ideals of corporate philosophy through exchanging opinions with owners and executives.

networking skills, (5) skills for experimentation), and learn about perspectives and initiatives for creating business innovation. Also, participants will visit companies that are innovating in business and consider what they can do based on concrete practical examples.

[4th Step]

Through lectures and exercises, participants will learn how to formulate specific business plans that lead to business innovation.

[5th Step]

Participants will create innovative business plans to solve economic and social problems around the world or in their countries by their discussion based on the theories, knowledge, and attitude of business innovation and organizational development learned during the course and present the plans on the final day.
